Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• "I never know what to say when I meet someone new." • "I want to sound informed and interesting, not generic." • "I wish I had a quick way to prep before an event."	• Will this person find me interesting or forgettable? • I hope I don't run out of things to say mid-conversation. • I need to make a strong first impression quickly.
PERSONA: Networking Event Attendee (Professional / User Type)	
DOES	FEELS
• Searches the internet last minute for talking points. • Attends events without a clear conversation plan. • Sticks to safe, generic small talk topics.	• Anxious about making a good first impression. • Relieved when a conversation flows naturally. • Confident when armed with good conversation starters.
