

Problem-Solution Fit

Date	28/06/2026
Team ID	XXXX
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

The canvas below maps the Personalized Networking Assistant's target audience, their pains and behaviors, and how the proposed solution addresses the root cause.

1. CUSTOMER SEGMENT(S) [CS] Working professionals attending conferences, meetups, and industry networking events	6. CUSTOMER LIMITATIONS [CL] - Limited prep time before events - Free-tier API rate limits - Variable internet access at venues	5. AVAILABLE SOLUTIONS [AS] - Generic starter apps - not fact-checked - Manual Google search - time-consuming - Asking colleagues - unreliable/limited
2. PROBLEMS / PAINS [PR] - Struggle to start conversations with strangers - Lack of quick, relevant talking points - Occurs at every networking event attended	9. PROBLEM ROOT / CAUSE [RC] No single tool combines event context with fact-checked conversation aids	7. BEHAVIOR [BE] - High anxiety before initiating conversation - Frequent last-minute online research
3. TRIGGERS TO ACT [TR] - Upcoming event/invite reminder - Feeling unprepared - Wanting to make a strong impression	10. YOUR SOLUTION [SL] Personalized Networking Assistant: an AI-powered app that generates event-specific conversation starters, fact-checks them via Wikipedia, and tracks history for future reference.	8. CHANNELS OF BEHAVIOR [CH] ONLINE Web search, social media, LinkedIn
4. EMOTIONS BEFORE / AFTER [EM] - Before: anxious, nervous - After: confident, relieved		OFFLINE Asking colleagues, event materials/brochures
